are created equally...

Introducing the world's most **Eco-friendly** solid surface bath fixtures

All WETSTYLE bathtubs, lavatories and shower receptors are now made of WETMAR BiO™. An industry first, WETMAR BiO™ is an eco-friendly thermo-insulating material made primarily from a mix of Mother Earth's natural ingredients – soy and mineral stone. WETSTYLE has pioneered a proprietary and code-compliant recipe that uses soy and vegetable extracts to replace the petrochemical-based resins in heavy use by the industry. In the spirit of Pure Design and Pure Craftsmanship, WETSTYLE is proud to offer the industry's purest and most environmentally friendly material.

WETMAR BiO™:

- High-natural mineral content providing superior strength, durability, slip resistance and natural thermo-insulation
- WETMAR BiO™ is non-porous, naturally stain, bacteria and UV resistant, harder than acrylic and is easy to clean and maintain
- The thermo-insulating properties of the material permit less energy consumption to warm bath water and provide a higher level of heat retention than traditional acrylic-based products
- Scratches, chips and abrasions are easily repaired returning the product to its original lustre
- The proprietary blend of lightweight mineral ingredients improve thermo-shock performance over competing products while simultaneously decreasing overall weight to size ratio of the product
- WETMAR BiO™ is uniquely offered in the industry's most luxurious finishes
True High Gloss™, Matte and Dual
- All WETMAR BiO™ products are uniquely handcrafted in Montreal, Canada
